

Cigarette and Tobacco Tax Revenue

Cigarette and Tobacco Tax

During the 2007 Legislative Session, the cigarette and the tobacco tax rates were increased with enactment of [SF 128](#) (Cigarette and Tobacco Tax Increase Act). The law change was effective on March 16, 2007, and provided the following:

- Increased the cigarette tax rate from \$0.36 per pack of 20 cigarettes to \$1.36 (an increase of 277.8%).
- Increased the tobacco tax rate from 22.0% of the wholesale cost to 50.0% of the wholesale cost.
- Increased the tax on cigars from 22.0% of the wholesale cost to a rate of 50.0% of the wholesale price or \$0.50 per cigar, whichever is less.
- Changed and increased the tax on moist snuff from a tax at the wholesale cost to a tax rate of \$1.19 per ounce.
- Created the Health Care Trust Fund (HCTF) and specified that beginning in FY 2008, the first \$127.6 million of cigarette and tobacco tax receipts be appropriated annually to the HCTF.

Since the tax rate increase was enacted, two other significant events have had an impact on the State of Iowa's cigarette and tobacco tax revenue. This includes:

- Enactment of [HF 2212](#) (Smokefree Air Act) that was implemented on July 1, 2008.
- Enactment of the federal government's cigarette and tobacco tax increase. The increase in the federal cigarette tax rate was approximately \$0.62 per pack and also significantly increased the federal tax rate on other tobacco products.

Although the actual impact of these two events on State cigarette and tobacco tax revenue is difficult to measure, the result appears to have reduced State cigarette tax revenue. **Chart 1** provides the twelve-month moving total revenue for the cigarette tax, the tobacco tax, and the combined cigarette and tobacco tax. The overall cigarette tax revenue has decreased since peaking at \$233.2 million in July 2008. Although cigarette tax revenue has decreased noticeably since these events, the decrease has been modest and the annual total stood at \$197.4 million at the end of September 2012. Since the federal tax on other tobacco products was implemented in 2009, tobacco tax revenue has remained relatively unchanged.

Cigarette and Tobacco Tax Revenue

Health Care Trust Fund – General Fund

Beginning in FY 2008, the Iowa Code required the first \$127.6 million generated from cigarette and tobacco tax to be appropriated from the General Fund to the HCTF within the fiscal year. The standing appropriation to the HCTF has been impacted by both General Fund across-the-board reductions and legislative changes. Changes to the HCTF include:

- A 1.5% General Fund across-the-board reduction resulting in a decrease of \$1.9 million to the HCTF in FY 2009.
- A reduction in the standing appropriation beginning in FY 2010 with enactment of [HF 811](#) (FY 2010 Health and Human Services Appropriations Act). The standing appropriation was reduced to \$117.8 million. Additionally, the FY 2010 General Fund appropriation to the HCTF was reduced by an additional \$11.8 million due to a 10.0% FY 2010 General Fund across-the-board reduction. The final FY 2010 appropriation to the HCTF totaled \$106.0 million.
- The standing appropriation was reduced to \$106.0 million beginning in FY 2011 with enactment of [HF 2526](#) (FY 2011 Health and Human Services Appropriations Act).
- Beginning in FY 2012 the appropriation was eliminated, but the first \$106.0 million of cigarette and tobacco tax revenue was deposited in the HCTF with the remainder deposited in the General Fund each fiscal year. This change resulted with enactment of [SF 533](#) (FY 2012 Standing Appropriations Act) during the 2011 Legislative Session.

Chart 2 provides information pertaining to the distribution of cigarette and tobacco tax revenue from FY 2003 through estimated FY 2011 (the estimated FY 2011 cigarette and tobacco tax revenue is based on the March 2010 Revenue Estimating Conference (REC) estimates). Prior to FY 2007, cigarette and tobacco tax revenue generated between \$95.1 million and \$98.7 million for the General Fund. In FY 2007, the amount increased substantially due to the tax increase that occurred just prior to the fourth quarter of the fiscal year. Beginning in FY 2008, the distribution between the General Fund and the HCTF has been as follows:

- FY 2008: The General Fund received \$123.1 million (49.1%) and the HCTF received \$127.6 million (50.9%).
- FY 2009: The General Fund received \$113.1 million (47.4%) and the HCTF received \$125.7 million (52.6%).
- FY 2010: The General Fund received \$126.1 million (54.3%) and the HCTF received \$106.0 million (45.7%).
- FY 2011: The General Fund received \$121.2 million (53.4%) and the HCTF received \$106.0 million (46.6%).
- FY 2012: The General Fund received \$119.5 million (53.0%) and the HCTF received \$106.0 million (47.0%).

Based on the most recent REC estimate for FY 2013, the estimated cigarette and tobacco tax revenue received by the General Fund will continue to decrease (\$118.0 million, down \$1.5 million from FY 2012) while the HCTF will continue to receive \$106.0 million.
